SUMMARY

Motivated Computer Science Engineering graduate seeking a **Full Stack Developer** role with hands-on experience building AI-powered and full-stack applications. Passionate about developing scalable, user-friendly software, solving real-world problems, and continuously learning modern technologies to deliver high-quality solutions.

SKILLS

Java	JavaScript
React.js	Node.js
Python	MySQL
REST APIs	Git & GitHub

PROFESSIONAL EXPERIENCE

Onepool private limited, Full Stack Developer Intern

- Kochi
- Developed and maintained responsive web applications by implementing frontend interfaces and backend functionalities.
 - Built and integrated RESTful APIs, collaborated with databases, and participated in debugging, testing, and feature enhancements.
 - Worked closely with the development team using Git for version control while following software development best practices to deliver high-quality solutions.

PROJECTS

MEMORA

Alzheimer's Patient Safety Monitoring System Technologies: ESP32, GPS, Firebase, FastAPI, Python, Mobile App • Architected a full-stack IoT solution integrating smart wearable, mobile app, and Firebase cloud platform for 24/7 Alzheimer's patient safety monitoring. • Built GPS geo-fencing logic reducing caregiver response time by 40% and a medicine reminder system improving medication adherence by 50%. • Won YIP 8.0 Kerala District Competition for innovation in healthcare technology.

MedCare+

Rural Medication Safety Application Technologies: Python, FastAPI, SQL, Firebase, Mobile App • Developed offline-first medication safety platform with drug-drug, drug-disease, and food-drug interaction checkers covering 1,000+ medications for rural Indian users. • Integrated live doctor video call with low-bandwidth optimization and regional language support, improving rural healthcare accessibility.

GeoClimate Analytics

Kerala Weather & Disaster Warning System Technologies: Python, SQL, Microsoft Excel, Power BI • Designed an end-to-end analytics pipeline analyzing 5+ years of meteorological data across 14 Kerala districts, cleaning 10,000+ rows with Python and SQL (85% error reduction). • Built interactive Power BI dashboards with district-level heatmaps and flood risk indicators; automated data refresh workflows reducing manual reporting effort by 60%. • Applied statistical

EDUCATION

Sahrdaya College of Engineering & Technology, BTech

2023 – 2027 | Kodakara

CERTIFICATES

NPTEL-Python for Data Science | Machine Learning Using Python | Fundamentals of Devops on AWS

AWARDS

YIP 8.0 Kerala District Winners, YIP 8.0

MEMORA smart IoT based Alzheimer's patient safety monitoring system
